Varn® Super Rubber Rejuvenator

Rubber blanket & roller rejuvenator

Specialist rejuvenator for all printing applications and press types

Product Features

- Varn® Super Rubber Rejuvenator cleans and deglazes rubber faster and more completely while restoring new life and printability to even the most glaze-blocked blankets and rollers. This excellent rejuvenator will pay for itself many times over in increased productivity and extended roller and blanket life.
- Varn® Super Rubber Rejuvenator will remove all glaze caused by friction, ink and stock coatings as well as light embossing and oxidation.
- Varn® Super Rubber Rejuvenator will restore original colour to blankets and rollers, reproducing the nap of rubber compounds, optimising ink transfer.
- Varn® Super Rubber Rejuvenator incorporates two beneficial features - fast drying and high flash point. This unusual combination produces a safe, effective cleaning method.

Advantages of Varn® Super Rubber Rejuvenator

- Economical in use.
- Extends working life of blankets and rollers.
- Optimises ink transfer properties of blankets and rollers.
- Fast effective deep cleansing of blankets and rollers.
- Restores original rubber texture.

Product code

KU40-OSRG-#### (final 4 digits relate to pack size).

Pack size

1 litre (O1AF), 10 litres (O1F9) and 200 litres (O1MP).

Application

Blankets: Use as a normal manual wash-up after long runs, when changing from dark to light ink and as part of a daily maintenance programme. Because of fast drying speed and outstanding cleaning action, a blanket maintenance wash actually takes less time than a regular wash.

Rollers: Outstanding for hand cleaning rubber and steel rollers out of the press and the cleaning of roller ends on the press. While Varn® Super Rubber Rejuvenator dries too fast for most regular roller wash-ups, it may be added to a regular Varn® wash up solution to improve cleaning action and increase drying speed as part of a maintenance wash-up programme.

Rubber parts: The periodic use of Varn® Super Rubber Rejuvenator will add new life to feeder rollers on press and on folders, suction cups and other rubber parts used in both printing and general industry.

Not recommended for use on urethane or EPDM rollers.

Follow relevant Good Manufacturing Practice (GMP) guidelines if used for the production of food packaging.

Flashpoint

52°C (All).

More products. Streamlined access. Greater results.

Flint Group's Print Media division offers a uniquely powerful combination of products, services and expertise; giving you access to the industry's broadest range of pressroom products.

Inks and Coatings. Pressroom Chemicals. Blankets. Sleeves. Consumables.

Rely on us for consistency, reliability and customer focus. Our aim is to make it easier for you to achieve your business goals. With Flint Group products in your pressroom, you can run your business with confidence and peace of mind.
